OPi-P User's Guide

MOST[®]
Compatible

Congratulations on purchasing your Nav-TV Corp. OPi-P interface. Please read this guide to learn about the features of your OPi-P, how to use its controls, and more.

OPi-P

A Little Product Insight

OPi-P is a direct iPod® interface developed for Porsche vehicles utilizing the MOST fiber optic bus. OPi-P is designed to interface with current versions of the iPod® and iPod® Nano. Once installed, OPi-P allows the ability to control iPod® functions from the vehicle's head unit, and also allows partial control of iPod® functions (volume adjustment and track control) from the vehicle's steering wheel controls. To minimize driver distraction, the iPod® interface buttons will not respond while the iPod® is docked and the OPi-P is active. While the iPod® is docked with the OPi-P interface, the iPod® will automatically begin charging. In order to activate the OPi-P your radio must be in CD changer mode. Vehicles equipped with factory installed CD changers will lose the function of the CD changer once the OPi-P is installed. Vehicles that do not have a factory installed CD changer will not lose any radio functions.

Navigating with the Nav-TV User Interface

We recommend that you spend some time familiarizing yourself with the features and operation of OPi-P while your vehicle is stationary. We incorporated several features into the product to allow quick and safe access to your favorite music or audio using head unit controls as well as steering wheel controls. Specific head unit buttons have designated functions. Below are the buttons used to navigate with the OPi-P, and descriptions of their functions.

Shortcut Buttons

CD

Pressing the "CD" button activates the OPi-P interface, and also activates the single in dash CD player. In vehicles equipped with a CD Changer, pressing the "CDC" button will activate the OPi-P interface, and also activate the CD Changer.

AUDIO

Pressing the "Audio" button displays real time information from the docked iPod®. Information such as current track title, artist, and play time, as well as, the play list library based on the information encoded in the music file.

Main rotary knob (right knob), used for iPod® navigation. Turning the knob left or right allows you to scroll through menu options. Once your desired menu option is highlighted, pushing the rotary button in will select that option.

Volume/Power Knob (Left Knob)

Press & hold to rewind through current track.
Tap once to browse previous tracks.

Press & hold to forward fast through current track.
Tap once to skip the current track.

Do not be distracted from driving safely! Be responsible! Neither Nav-TV Corp. nor Apple Computer, Inc, it's regional offices, distributors or resellers accept any responsibility for any damage or injury as a result of OPi-P with the iPod! Exercise good judgment and keep your eyes on the road at all times!

1

Press & hold for two seconds to play your current selection.
Tap once to select track number one.

2

Press & hold for two seconds to access the iPod's® play lists.
Tap once to select track number two.

3

Press & hold for two seconds to access the iPod's® artist list.
Tap once to select track number three.

4

Press & hold for two seconds to access the iPod's® album list.
Tap once to select track number four.

5

Press & hold for two seconds to access the iPod's® genre list.
Tap once to select track number five.

6

Press & hold for two seconds to access the OPi-P auxiliary audio input. Tap once to select track number six.

Quick Tip: Number buttons on the head unit are also used to select corresponding tracks. i.e. pressing **2** once will take you to track 2 in that play list. Pressing **1** **2** takes you directly to track 12, etc.

OPi-P

OPi-P Library Navigation

OPi-P was engineered for iPod® lovers by iPod® lovers, with a common goal in mind. Simplicity. OPi-P puts the familiar iPod® menu right on your head unit, making OPi-P an extremely user friendly interface. Music and audio files are displayed as the same as they are stored on the iPod®. OPi-P allows you to browse music files by play lists, artists, albums, and genres. Before using your OPi-P, we recommend that you organize your audio files into categories on your iPod®. In order to browse your music library by play lists, access your main audio screen by pushing the audio button on your head unit.

Browsing by Categories

Organizing your iPod® music library into categories, allows stress-free browsing of your music library. Below you can find steps for browsing by play lists, artists, albums, and genres using your OPi-P interface.

Browsing by Play Lists

- Step 1: Select "CD List" > "Play Lists"
- Step 2: Select "Track List" > Desired Play List
- Step 3: Select "CD List" > "Play Selection"

Browsing by Albums

- Step 1: Select "CD List" > "Albums"
- Step 2: Select "Track List" > Desired Album
- Step 3: Select "CD List" > "Play Selection"

Browsing by Artists

- Step 1: Select "CD List" > "Artists"
- Step 2: Select "Track List" > Desired Artist
- Step 3: Select "CD List" > "Play Selection"

Browsing by Genres

- Step 1: Select "CD List" > "Genres"
- Step 2: Select "Track List" > Desired Genre
- Step 3: Select "CD List" > "Play Selection"

Auxiliary Audio Input

The OPi-P interface is also available with an optional auxiliary audio input. OPi-P kits with the auxiliary audio input will include a modified main harness (w/ two female RCA jacks for left & right audio input) and upgraded software. Once the OPi-P is completely installed, refer to the following in order to activate the auxiliary audio input.

Activating Aux In

- Select "CD List" > "Extras"
- Select "Track List" > "Aux In"

Library Paging

OPi-P is designed to display it's categorized information in increments of thirty. For example, if the OPi-P user has one hundred songs in a playlist, you will be able to access all the songs in the playlist, but will only be able to display them thirty at a time. Refer to picture below to utilize the "Next Page" & "Previous Page" options of the OPi-P.

Do not be distracted from driving safely! Be responsible! Neither Nav-TV Corp. nor Apple Computer, Inc. it's regional offices, distributors or resellers accept any responsibility for any damage or injury as a result of OPi-P with the iPod! Exercise good judgment and keep your eyes on the road at all times!

OPi-P

Track Sequence

Adjusting the track sequence is quite simple using the OPi-P. Play options such as repeating the CD (Selection), repeating the track, playing playlist songs at random, or normal play mode are easily accessible from the track sequence menu. Refer to the following steps for selecting track sequence modes.

Repeat CD (Selection)

Step 1: Select "Track Seq."
Step 2: Select "Repeat CD"

Normal Play Mode

Step 1: Select "Track Seq."
Step 2: Select "Normal"

Repeat Track

Step 1: Select "Track Seq."
Step 2: Select "Repeat Track"

Activating Manual or Radio Controls

OPi-P allows the ability to control iPod functions from the vehicle's head unit, and also allows partial control of iPod functions (volume adjustment and track control) from the vehicle's steering wheel controls. To minimize driver distraction, the iPod buttons will not respond while the iPod is docked and the OPi-P is active (feature can be overridden by using the manual control feature). ***Note*** If the vehicle and/or head unit is powered down when the OPi-P is in "Manual Control", when you power up the OPi-P you will have to activate "Radio Control" because the iPod buttons will not respond.

Activate Manual Control

Select "CD List" > "Extras"
Select "Track List" > "Manual Control"

Activate Radio Control

Select "CD List" > "Extras"
Select "Track List" > "Radio Control"
