VFC-RR	Fig.2- VFC-RR(RSE Modified for video out)
<p>This modification is only for pre '09 vehicles that do not show DVD video in Park. If the vehicle displays DVD video, then the GREEN port will be populated.</p> <ol style="list-style-type: none"> 1. After receiving modified RSE unit, reinstall into factory location. 2. Run an RCA cable from the YELLOW RCA port added to the RSE to the front screen. 3. Take the supplied FAKRA to RCA cable, and plug the FAKRA end into the GREEN port on the back of the screen/radio. 4. The RCA cable from the RSE module gets plugged into the female RCA end of the FAKRA to RCA cable. 	
VTC-RR	Plug-n-Play location
<ol style="list-style-type: none"> 1. Before installation of the product, verify if the vehicle has a factory rear-view camera. 2. The module is programmed with rear-view camera off by default, so if the vehicle has no camera, then no additional programming is required. 3. If the vehicle is equipped with a factory rear-view camera, the module needs to be programmed for "Camera: On". If the vehicle is placed into reverse and the camera image is not displayed, please verify the <i>Camera</i> setting via the Nav-TV USB Updater. <ul style="list-style-type: none"> • Programming software can be found at www.NAV-TV.com; go to the downloads page and select the VTC-RR update. 	<ul style="list-style-type: none"> • LR3 and Sport is located behind the radio. • 05 & 06 Range Rover is located at tuner module behind the radio. • 07-09 Range Rover is located at the tuner module behind the glove box.
